SEMINARIO SOBRE LA ENERGIA Y SANIDAD AMBIENTAL RURAL

Descripción:

About the Organizer Founded in 1979, Biogas Institute of Ministry of Agriculture (BIOMA) is a professional institute of research, technical exploration, engineering design, and training for administrators and technicians on renewable energy technology. BIOMA has been engaged in the research on technical and integrated utilization of biomass, fundamental theory and applied technology of anaerobic microbiology, industrial wastewater, urban domestic sewage and anaerobic digestion for large animal breeding farm as well as the discharge standard. Additionally, renewable energy utilization in rural area, hygienic and ecological development has been covered. In the past 30 years, BIOMA has fulfilled many important national research projects and international cooperative projects for assistance, demonstration and professional training in foreign countries. Entrusted by the Chinese Government, BIOMA has held 40 international training courses for 921 participants from over 100 countries in total as well as more than 1,000 Chinese administrators and technicians in renewable energy industry from 35 provinces, municipalities and autonomous regions in China.

The training course will invite officers and experts in energy and sanitation to present lectures, hold forum and lead study tours for participants to theoretically and practically obtain the knowledge of renewable energy application and environmental improvement, understand the structure of Chinese renewable energy organizations, service mechanism, developing strategies, policies and regulations for the promotion of cooperative and technical exchange in renewable energy and sanitation internationally, improvement of renewable energy and sanitation management and service, as well as a further friendship with other developing countries.

The main content of training covers: Basic Situation of China, The Update Status and Development of Renewable Energy in China, Rural Energy and Relative Sanitation Standard, Regulation and Law in China, Biogas Integrated Utilization of Digested Slurry and Post Treatment Technology in China, Large and Medium Size Biogas Fermentation Reactors on Livestock and Poultry Farms in China, Biomass Gasifier and Energy-saving Stove in China, Small Hydropower and Micro-hydropower Technology in Rural Areas of China, China Environmental Sanitation Law, Control of Zoonosis in China, Environment and Energy in China, etc. Forums are scheduled specially on rural energy development and sanitation management in less-developed areas in accordance with characteristics of participating countries.

During the training course, there are 13 lectures and 7 study tours to construction sites and demonstration projects.

Disciplinas: MEDIO AMBIENTE. RECURSOS NATURALES.
AGRICULTURA
INDUSTRIA

Fuente: China

País: China

Ciudad: Chengdu, Provincia Sichuan

Duración desde: 12/10/09 Duración hasta: 01/11/09 Fecha límite solicitud: 30/08/09

Idioma: Inglés

Beneficios:

Pasajes internacionales y subsidio de tránsito con un monto de US\$ 200.- .
Gastos de alojamiento y alimento
Gastos de transporte local derivados de las actividades organizadas por parte china durante su estadía en China.
Gastos menudos de 80 yuanes de R.M.B. (moneda china) por día.

Requisitos:

Officers at department and bureau level should be not more than 55 years old,
officers at division chief level not more than 50 years old.
Without infectious diseases, healthy and non-disabled
English
No accompany.
Curriculum Vitae
Fotocopia del Título
Formulario de inscripción

Observaciones:

Los interesados podrán solicitar formularios en becas@opp.gub.uy el que una vez completo y con la documentación solicitada deberán entregar por duplicado en la Sección Becas de OPP, 4º piso del Edificio Libertad de 9 a 17.30 hs. sfb
