

Field Service Engineer URUGUAY

Join ABB and work in a team that is dedicated to creating a future where innovative digital technologies allow greater access to cleaner energy.

From rapid response and performance improvement to operational efficiency and life-cycle management, Service is one of our fastest-growing areas.

You will execute service work with Motion Business in Uruguay. You will act as the technical point person between customers and extended ABB teams.

Your responsibilities

Providing on-site or remote technical support for installation and commissioning of equipment and routine maintenance independently, identifies technical problems and makes analysis through remote or on-site activity in different Service categories.

Consulting with and advising customers on the best service solutions in accordance with standard processes, procedures and safety guidelines.

Creating and maintaining strong relationships with customers, understanding their needs and providing specialist support and solutions.

Coordinating and executing specialist projects through planning, meeting milestones and regular reviews.

Identifying opportunities for the development of new service applications, equipment and methods.

Some travel will be required, as the role will require hands-on support at customer sites.

Living ABB's core values of safety and integrity, which means taking responsibility for your own actions while caring for your colleagues and the business.

Your background

A Bachelor's degree in Technological or Electrical engineer.

More than 2 years of experience in Electrical field, working as Service Engineer or related with Drives.

Sound knowledge of and hands-on experience in servicing, maintaining, commissioning and repairing of insert specific product and industry/sector.

Knowledge of Drives, instrumentation and motion.

Ability to travel.

Proven leadership skills, with a collaborative, solutions-oriented approach and strong communication skills.

Technical English.
